

MYLENE E. TENORIO

Profile

An entrepreneur and a licensed Filipino Architect, who is running the family business at the same practicing her profession. After Singapore, I decided to focus in our family business leaving my love for design and architecture. Currently in my online class journey with Academy of Arts University, it helps me bring back my love for designing.

I have always been into crafting spaces that reflect each of my client's hopes and dreams. Taking notes of every little detail of their visions and make them into reality.

Now that I am entering a deeper scale of Interior design and Architecture, I want to utilize and apply these further knowledge as well as value to design world.
